## Project Title: Hilma af Klint Website

I think this site would work best as a multi-page site with a navigation bar. Pictures of her works can be used throughout as a design element, but all pages except the gallery page can have a lot of creative liberty. Gallery page should be pretty simple to focus on the art. The site pages would be:

- Life
    - bio from her wiki
- Work
    - Not to be confused with gallery this page is predominantly text
    - Description of her works from wiki
    - Spirituality/other influences
- Gallery
    - Self-explanatory: gallery of selected works
- Sources
